

# Motorcycle Training

Over the last few years motorcycle requirements have changed, you now have a choice which course you would like to take.

The type of course you decide will mainly depend on your age, it will also depend on when you applied for your driving licence even if or when you passed your car test.

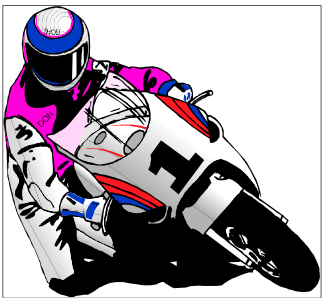

In any event you must complete a Compulsory Basic Training course ( C.B.T ) first before you ride.

If you are 16 years old you must have a provisional licence with category P entitlement.

If you are 17 years old you must have a Full car or Provisional licence with category A entitlement.

If you are 21 years old you can take a Direct Access or Accelerated Access course

# Motorcycle C.B.T Training

Anyone who wishes to ride a motorcycle must undertake a C.B.T course, the course duration will solely depend upon your experience and normally takes around 6 to 8 hours to complete over 1 or 2 days.

Once you have completed the C.B.T your Instructor can advise you which course is right for you. You will now need to take a Theory Test before you can progress to the module 1 Test. You can ring the DSA direct on 0300 200

1122, or go to [www.dsa.gov](http://www.dsa.gov). and follow the links to book a theory test. You will need your licence and payment card to do this and the cost of the Test is £30.00.

Once you have decided which course is right for you then we can make all the arrangements for your test.

*Ensure you are well  
equipped for a  
first time pass*

People take up motorcycling for many different reasons.

It can be a cheap form of transport even an exciting recreation, however a motorcyclist needs to have the correct attitude.

Motorcyclists are more vulnerable which puts you at a greater risk from most road users, the need to use all your powers of concentration, skill and judgement is required at all times in varying road and traffic conditions.

One of the main reasons why you are more vulnerable is due to the fact that a motorcyclist has no protective shell to take the impact should things go wrong.

By developing a safe motorcycling attitude from the very beginning you will be well equipped to gain the experience needed in todays varying road and traffic conditions.
